

Welcome to Polykote. Polykote evolved from a passion to collaborate with customers to provide coated materials that exceed performance requirements. We are committed to partnering with our customers to develop proprietary solutions to challenging applications.

Polykote specializes in producing materials with a unique coating, adhesive or construction. Our team of experts work with you to develop an optimal solution. We can use your materials, our materials or a combination of both.

If your final product is a pressure sensitive label, we can help. Not only are we able to adhesive coat, we can die cut and slit the product, offering a seamless manufacturing process from raw material to fully converted rolls of labels saving you time and money.

PRODUCT DEVELOPMENT

Polykote's customer-centric product development process begins with an analysis of your specific application. We won't simply pull a product off the shelf or send samples of something that "might" work. Instead, we get to know you and your requirements.

Our engineers can formulate new coatings specifically for your application or we can optimize commercially available coatings for your needs. As a team we will work together to determine the right approach.

COATING

Mayer Rod - Direct & Transfer, Flexo

Our broad range of coating equipment enables us to use the best tool for each job. With multiple coaters varying in specifications, you are guaranteed to receive a product that is produced in the most efficient and economical way possible.

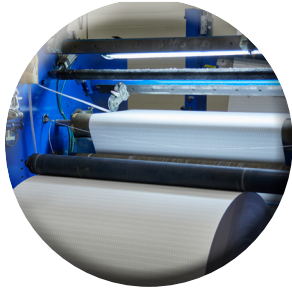

LAMINATING

In addition to producing pressure sensitive laminates, many customers need multiple substrates permanently laminated together resulting in a durable, functional multi-ply material. We utilize our coaters to **efficiently combine multiple webs into one.**

- Width: 2" - 62"
- Max unwind: 60"
- Thickness: .5 mil - 20 pt tag
- Materials: paper, film, foil, woven and non-woven fabrics

Capabilities

DEVELOP • COAT • LAMINATE • SLIT • SHEET • CONVERT

SLITTING & SHEETING

Our expertise goes beyond applying coatings. Polykote is committed to getting you what you need in the configuration that works for you. In-house slitting and sheeting equipment allows us to provide rolls or sheets that meet your requirements.

- Slitting Width: 1" – 62"
- Max Unwind:: 50"
- Max Rewind: 30"

LABEL CONVERTING

Polykote not only coats and laminates specialty label products but those materials may also be converted into finished label rolls. Three flexo presses ensure orders will glide through the system, minimizing lead times from ordering coating services to final product delivery.

- Max Width: 20"
- Max Unwind: 20"
- Colors: 8

TESTING

A dedicated in-house quality laboratory with ovens, viscometers, electronic balance, micrometers and adhesive property test instruments are engaged in process and product development.
